

REMARKS/ARGUMENTS

One of the objectives of the present invention is to provide a Venetian blind that is assembled easily and conveniently as set forth in the specification of the present invention. The claims have been amended in a manner to further define the structure of the present invention which can be assembled easily and conveniently and in a manner to define over both van der Zanden, Cheng, Bullat, Welfonder, and Popat, whether taken singly or in combination. Thus, it is respectfully submitted that the rejections of the claims have been overcome. Favorable reconsideration is respectfully requested.

Therefore, since the claims of the present application have been shown to include limitations directed to the features of applicant's blind having a motorized drive mechanism which are neither shown, described, taught, nor alluded to in any of the references cited by the Examiner, whether those references are taken singly or in any combination, the Examiner is requested to allow claims 1, 5, 6 and 8-24, as amended, of the present application and to pass this application to issue.

Respectfully submitted,

Ker-Min Lin

Dated: May 9, 2006.
